WHO IS WHITTIER COLLEGE?

PART TWO

WHITTIER COLLEGE ALUMNI ASSOCIATION

OFFICERS

Eugene M. Marrs '50, Whittier, *President*; Dr. John D. Kegler '38, Palos Verdes Estates, *President-elect*; Thomas V. Deihl '47, Whittier, *Immediate Past President*; and Kenneth L. Ball '34, Whittier, *Past President*.

MEMBERS AT LARGE

Stanley G. Alexander '48, Santa Ana; Ray S. Dezember '53, Bakersfield; Stephen A. Gardner '40, Los Angeles; Wayne L. Harvey '60, Whittier; and Russell P. Vincent '40, Whittier.

CLASS REPRESENTATIVES

Judith Ann Shuler '64, Santa Ana; Kenneth Hunt '65, Downey; Gregory Hardy '66, Torrance.

COMMISSION CHAIRMEN

Wayne Harvey '60, Whittier, *Alumni Fund*; Mrs. Alan C. Davidson '63, Whittier and Mrs. George Marich '63, La Puente, *Activities Co-Chairmen*; Stephen A. Gardner '40, Los Angeles, *Publications*; Donald C. Bishop '61, Hacienda Heights, *Student Alumni Relations*; Dean E. Triggs '33, Ventura, *Education*.

ASSOCIATES PRESIDENT

Vincent Sinatra '33, Glendale.

CLUB PRESIDENTS

Dr. Robert Thompson '43, Whittier, *1195 Club*; Mrs. Anthony Pierno '54, Whittier, *Cap and Gown Alumnae*; Alice C. Lembke '40, South Pasadena, *Broad Oaks Alumnae*.

SOCIETY PRESIDENTS

Mrs. John Baker '57, Whittier, *Athenians*; Mrs. Ronald Rogers '57, La Habra, *Ionians*; Mrs. Hollis Griffen '60, Costa Mesa, *Metaphonians*; Mrs. Kendall Bowlin '55, Whittier, *Palmers*; Mrs. Lela Martin '64, Whittier, *Thalians*; John W. Brink '56, Whittier, *Franklins*; Stuart Gothold '56, Whittier, *Lancers*; Elwyn B. Dyer '50, Los Alamitos, *Orthogonians*; Robert Davis '62, Los Angeles, *William Penns*; and Jack W. Baker '59, San Gabriel, *Sachsens*.

EX-OFFICIO

Dr. Paul S. Smith, President, *Whittier College*; Buck Ferguson '67, President, *Associated Students*; Dr. Robert W. O'Brien, and Dr. W. Roy Newsom '34, *Faculty Representatives*.

ALUMNI REPRESENTATIVE TO THE ATHLETIC BOARD OF CONTROL

Eugene M. Marrs '50, Whittier.

THE ROCK STAFF

Darrell W. Ryan, *Editor*; Richard Cheatham '68, *Sports Editor*; and Bob Bates, *Graphics Designer*.

Member: American Alumni Council
American College Public Relations Association

ASSOCIATION ELECTION

PRESIDENTIAL CANDIDATE

Please return
ballots by
APRIL 15th

John Kegler '38 has been with the Los Angeles School system since 1946 and Principal of the San Pedro Adult School since 1958. He holds a Masters and Doctorate in education from the University of Southern California. He served as Alumni Association Vice President this year. His community interests include: Vice President of San Pedro Kiwanis, Lay Reader in the Episcopal Church, past member of the board of the Palos Verdes Community Art Association. Kegler and his wife Jean Ray (Bassett) '38 have two children, Jean Ellen, who is in her Junior year at Whittier and John, a ninth grader.

VICE PRESIDENTIAL CANDIDATE

Stephen A. Gardner, '40, has followed the advertising/public relations profession. He is currently the public relations director of the Meals for Millions Foundation in Santa Monica. He is an administrator for the high School Golf Program and a member of the Santa Monica Lions. Mr. Gardner is also the editor of California Golfer and has recently authored two books — "It Pays to Steal" (Maury Wills) and "Refugee in Paradise." He resides with his wife Althea and three children, Althea 21, Robert 20, and Stephen III 16 in the Bel Air area of Los Angeles.

BOARD CANDIDATE

Jack Mele, '43, is presently Assistant Principal for Business and Activities of Whittier High School. His community interests include membership on the Whittier City Parks and Recreation Commission, Whittier Elks Lodge, and Board Member of the 1195 Club. Mr. Mele and his wife Eileen (Woodward '43) have two sons, John, attending Rio Hondo Jr. College and Vincent, a fifth grader.

BOARD CANDIDATE

Arthur T. Hobson Jr., '43, is presently Assistant Superintendent, Educational Services, Whittier Union High School District. He was previously a teacher at Whittier High School and Principal at California High School. His community interests include East Whittier Kiwanis, East Whittier Presbyterian Church and the YMCA. Mr. Hobson and his wife Barbara (Robinson, '43) have three children, Dick a freshman at the University of Redlands, Kathleen, a Calhi sophomore and Patricia, a sixth grader at Mar Vista Elementary School.

WHO IS WHITTIER COLLEGE

PART TWO

By DR. W. ROY NEWSOM '34

As one enters the refurbished lobby of Mendenhall Administration Building, he faces the mantel bearing this inscription by John Greenleaf Whittier:

Early hath life's mighty question
Thrilled within thy heart of youth
With a deep and strong beseeching
What and where is truth?

Does it not suggest in a quiet sort of way that one has entered the door of a good place to begin the search? Seven generations of questioning hearts have called that place their Alma Mater, their nursing mother. Certainly she has nourished them with the milk of human kindness; has he also in her wisdom advanced them in their quest? And what about this mother who grows older and wiser with the years and yet remains forever young? Who is Whittier College, what is she?

Whittier is the freshman, jittery, excited, bold yet timid, and fearful of the weeks ahead.

Whittier is the roommate — met for the first time — with the hopes for companionship throughout College hanging in the balance.

Whittier is President Paul S. Smith's message on the first all-college convocation.

Whittier is the deluge of books assigned as essential material of college.

Whittier is the dormitory, the Campus Inn, the class, the library, the seminar, the date and the game.

Whittier is the fear of the first examinations, the mid-terms, the finals.

Whittier is the first name order of friendship between faculty and students.

Whittier is the Copenhagen campus, the College Bowl, the College Report.

Whittier, finally, is the amphitheater, the President's handshake and the diploma.

All these things are Whittier, but of more lasting importance are the long hours spent under the influence of increasing academic pressure in acquiring the tools, techniques and information which entitle one to the "rights and privileges appertaining to the College degree." Like the energizing spring behind the hand on the clock, the constant academic force moves the developing and maturing mind ahead on schedule. The process seems slow but we are making sure that it is certain.

Our 1967 academic program incorporates what we think is the best of the proven past with the

exciting fruits of the present as our course offerings continually change and modernize. One example is our composition and reading program which has continuously evolved from conventional freshman English through three stages represented by the course titles, Significs, Basic Communication, and presently First Year Reading and Composition. An approach once regarded as too radically different to survive is now generally recognized and its methods and materials are being adopted in numerous progressive programs throughout the nation, and its originator, Albert Upton, is in continual demand as a conference speaker and educational consultant. The methodology, analysis and probing inquiry to be found in this one example indicates the College's answer to John Greenleaf Whittier's "deep and strong beseeching" of "What and Where is Truth."

Other departments of the College are equally involved — for the search for truth weighs heavily on the minds of modern college youth. The previous decades of pre-fabricated education prepared and package-dealt in ideally purified lectures has been seriously challenged by today's students. The problem is that what we thought was good basic education of the past is simply not furnishing answers with sufficient accuracy for the problems facing the modern young adult. With some students, this frustration with conventional educational patterns appears as dissatisfaction with anything handy and timely and may result in demonstrations of one sort or another over a seemingly insignificant item.

But in a larger sense, I believe it represents merely a passing phase in the long term analysis of social data regarding causes and results of our standardized and stereotyped system. Modern teaching must keep itself on the pace with changes inside and outside the scholarly community. I can think of no significant academic discipline which is not affected. Science in all its aspects has moved continuously from the teaching of descriptive materials to the inductive development and the logic of concepts incorporating the widely accepted scientific method. The "New Math" and computer science have revolutionized both the thought and scope of mathematics. Business administration and economics currently move with new ideas and new terms unknown a few years ago. Psychology is becoming more and more involved with physiology and biochemistry. Theories of political and sociolo-

ew Language Lab

gical systems are undergoing changes which are equally far-reaching. Even the old foundations of various religious faiths have not been spread and we are seeing changes develop in their sectarian regulations. Today's computerized industrialist and business man tends to stand in condemnation of his totally inadequate training of only a few years ago.

Where and what are the answers? We would not be so smug or so naive as to suggest that we have them in hand. We recognize that what we did in the first half of the 20th century is not good enough for the second half. Our leaders at Whittier, both faculty and students, are searching for better ways of analyzing the present mountains of data for meaningful and satisfying concepts which will serve our students as adequate tools for life in the next 50 years.

To implement these necessary changes in educational thought we are now well along in the construction of a 3.4 million dollar science facility to give our students training in the use and understanding of the latest developments in science. The million dollar Bonnie Bell Wardman Library has been built and designed for the best possible use by the students and faculty. The upper level of Mendenhall Building which for many years held the library reading, periodical and reference rooms, has been rearranged and refurnished into six sections with portable chest high dividers, each accommodating 12 to 15 students. This arrangement has given our General Studies program in English and Social Science a new face. Each huddle of students has a staff leader and all six huddles are supervised by the instructor who continuously moves among sections and is immediately available at the mere beckon of the leader's hand. These "little seminars" increase student involvement and generally are providing a satisfactory alternative to the passive character of lecture-oriented classes. A neuropsychology laboratory has been developed for student investigations with small animals, as an adjunct to the program in the behavioral sciences. A language laboratory with the most modern recording instruments is now in full use. A direct line telephonic connection to a computer system is in daily operation between the College and Western Data Processing Center, giving students an understanding of

General Studies Lab

problem-solving capabilities in computer service. A laboratory for sociological field work brings the methods and technology of these investigations before the student for critical study. Special course groupings for studies in the developing nations of Latin America and in World Political Systems gives the student an insight into International Relations. In addition, there are an increasing number of seminar type courses offered for upper division students and approximately 10% of all students are involved in some type of independent study or special problem investigation. Even though some general classes are necessarily large, 60% of our classes have fewer than 25 students!

By the use of such procedures and facilities we hope to increasingly involve the student himself as we develop the background for our search for truth and for the fabrication of the academic features which we feel to be essential in modern life.

Faculty interest and concern rides high in the search for better methods of instructing today's students. Of course, one very important factor is the professor himself, and we seek every opportunity to get the Whittier teacher into contact with the student.

Modern education must be geared to change. Tomorrow's minds must be adaptable. We must not be undone by but must be able to adjust to and cope with revolutionary changes in every aspect of life. It would be a miscarriage of education if we were to teach by the patterns of the early 20th century for even though the same academic cloth may be used, the styles and applications must reflect modern usage. It is to this end that academic freedom must be kept free to move, to search and to explore ahead of present practice in any and all fields. To remain static and complacent in teaching in any age would be to court failure in the midst of a rapidly progressing civilization and the best preparations we can give our students for the years ahead lie in the general basic concepts of knowledge embellished by the use of all the modern tools. The search after truth will be a continuing search in the generations ahead and our Alma Mater who grows older and wiser with the years and yet remains forever young will have answered for many privileged sons and daughters — who is Whittier College, what is she?

A WHALE of a study

Take a solo drive in a near-antique, 1949 panel truck from Los Angeles to Point Barrow, Alaska.

Top it off by braving sub-zero temperatures on a chunk of floating sea ice while bartering tools for whale bones with a group of Pepsi-generation Eskimos.

Do this, and you'll get an idea of the twice-yearly activities that biologist Dr. Floyd Durham '30 is performing in the interest of science.

Dr. Floyd Durham, a research associate with USC's Hancock Foundation, is one of the few scientists in the world actively studying the bowhead whale. Trouble is, the bowhead is relatively rare and protected by International Law. Specimens for study are hard to come by.

Obstacle? Not to Dr. Durham.

He learned that the species appears in the frigid waters off Point Barrow during the spring and fall, and that local Eskimos hunt them by privilege.

Operating on a limited budget under grants from the Arctic Institute of North America, Dr. Durham re-introduced the ancient system of bartering to negotiate with the Eskimos for the prized sections of the bowhead.

He observed the Eskimos butchering their catches with primitive blubber spades. Next trip, he brought with him a stock of more efficient Norwegian flensing (butcher) knives to trade for miscellaneous whale parts. The system worked.

Since then, knives, harpoons, plastic floats and other modern equipment have brought Dr. Durham bowhead skulls, jaws, ribs, vertebrae, parasites, baleen (horn-like substance of the throat), and even whiskers.

Happily, the primitive economic system has enabled Dr. Durham to amass the largest collection of bowhead whale bones in the nation — well over three tons by the scientist's own estimate.

This in itself poses a problem in logistics. How

do you transport a quantity of whale bones large enough to fill a semi-truck trailer from far-off Point Barrow to Los Angeles?

Dr. Durham almost has this one solved: He made arrangements to have his prized collection flown as far south as Fairbanks in the Arctic Research Laboratory airplane, and then transported by a truck on one of its "empty" return runs from Fairbanks to Seattle. The researcher now is looking for reasonably-priced transportation for the collection from Seattle to Los Angeles.

When the collection finally arrives, Dr. Durham will present the bones to the Los Angeles County Museum of Natural History.

The researcher's routine in the frozen land is a picture of efficiency built on the best teacher of all: experience garnered from semi-annual trips there during the past six years. With the exception of occasionally using an Eskimo guide, Dr. Durham runs a one-man operation.

He travels as close as possible to the whale butchering sites in a tracked vehicle. Then, armed with trading goods and his own equipment, including sleds, tripods and chain hoists, he proceeds on foot over the dangerous sea ice to where the Eskimos catch and butcher the whales.

The Eskimos' life in Barrow, Dr. Durham says, is not the popularly-supposed primitive civilization. Snow "scooters" and larger tracked vehicles have almost completely replaced the dog sleds of another era. Villagers now live in ready-cut houses fueled by gas and lighted by electricity, in marked contrast to the tarpaper and sod dwellings of the past. The community boasts a new hospital, a water distillation plant, churches and school.

The Eskimos, many of whom are employed by the local Arctic Research Laboratory of the Office of Naval Research, no longer are economically dependent on whaling. They do use the meat, the scientist says, but their continued interest in whaling is largely motivated by "the tradition and romance of it."

Though children of the 20th century, the Eskimos' whaling methods are inefficient. On the average, the hunters recover only one in five of the whales they kill.

This has awakened the conservationist in Dr. Durham, and has inspired him to an auxiliary project: he is at work in his home shop perfecting a harpoon device equipped with a tranquilizer which will allow the whalers to recover a much higher percentage of the specimens they kill.

Dr. Durham was graduated from Whittier College in 1930 and took the Doctor of Philosophy degree in vertebrate zoology at the University of California at Berkeley in 1942.

He has been associated with USC's Hancock Foundation since 1945.

Dr. Durham's wife, Ruth Esther '37, is a counselor at El Monte High School. They live at 11932 Roseglen St., El Monte.

WHAT'S NEW AT

MENDENHALL LOUNGE

Three hundred and eighty five yards of custom loomed, 100% Wool, Philadelphia Carpeting sets a restful theme and mood in pale olive green with darker olive and gold highlights. Carrying out the spanish-mediterranean motif are specially designed divans and matching chairs, by Crossroads of Whittier, in linen colored brocades of gold and burnt umber pattern. Accentuating the windows and balconies are draperies of antique-cut velvet in a bronze-tone gold. The beautiful collection of original oils and fine prints were cleaned and gallery lighting was added to enrich their display. The famed Whittier mantle is flanked by two antique tufted benches in a deep wine color which matches the two throne chairs by the front entrance. These chairs are covered in a bold multi-colored fabric which was keyed to the decorative ceiling, the hall-mark of early California Spanish architecture. The Women's Auxiliary of the College gave a \$1500 gift toward the redecoration.

STUDENT UNION LOUNGE

A complete renovation designed to increase the utilization of the Student Union Lounge was completed in late August. A complete change of feeling for the vast modern designed room was wrought with the addition of wall to wall carpeting of the type being used in schoolrooms around the country. It has its pad laminated through a vulcanization process and is glued to the floor which helps it resist the normal hazards of wear of conventional laying methods. The wall colors and beams are in shades of gold with an accent wall in a deep cocoa brown. Fiberglass draperies provide much needed light control in a matching shade of gold. Four large theme sofas are covered in a fabric of brilliant floral design, and the smaller couches are covered in a heavy plastic covering in hot orange. A grouping of over-stuffed barrel type chairs highlights the conversation corner which is behind the camera. The carpet is a wool and nylon blend in an Olive green tweed.

WHITTIER COLLEGE

COMPUTER AT WHITTIER COLLEGE

Whittier College has a computer—well, almost! Located in the basement of Mendenhall, under the watchful eye of Hugh Maples, instructor in Mathematics, is an IBM 1050 remote terminal by means of which the College is connected to an IBM computer model 7094 which is a high speed large capacity computer. The connection is made by means of a data phone set over ordinary telephone lines.

The IBM 7095 is located at the Western Data Processing Center on the UCLA campus. Use by other colleges is made possible by an agreement between IBM Corporation and the University of California which specifies that a certain portion of the available computer time shall be made available to all four-year colleges in the Western States. Such use is restricted to research or teaching purposes. Commercial use such as payroll calculations, grade point averages, etc., are not permitted.

Presently the system is being used by Mr. Maples in teaching a course in Numerical Analysis and Computer Programming. This is, of course, oriented towards scientific and mathematical work. It is the hope of the instructor that those who complete this course can go out into the world able to write meaningful computer programs to solve the problems of

business, industry, and science.

The facility has also been used by other departments to demonstrate to students, in fields other than Mathematics, the power of the Computer. Each student in the course has written and "run" five meaningful and difficult programs during the first semester and will continue to move on to more complex programs during the second semester.

For those of a mathematical bent, it has been proven that there is no formula for finding the "roots" of an equation of degree higher than "four." The students will use numerical methods and the computer to solve such an equation of any degree. They will solve problems the equivalent of finding the minimum cost to a company of designing and producing a product to meet certain requirements.

Along with the excitement of having the use of a computer is some frustration with the remote terminal setup because of the slow input-output time over the limited telephone lines that must be shared by several colleges and research projects. Although the computer can solve the problems almost instantly it is often necessary to wait a long period of time for a clear line over which the answer can be sent.

You won't
want to
put this
book down!

WHITTIER

Quaker College in California

Publication of a new and full-scale history of Whittier College is an event of special interest to alumni and former students. Type now being set, the book will be published in mid-May by The Ward Ritchie Press of Los Angeles, whose select list of beautifully printed books of Western Americana is widely recognized.

The size of the volume is announced as 6" x 9", approximately 384 pages of text, 32 pages of illustrations, and two special maps—the list price, \$7.25—the scheduled date, May 11th, which is the 80th anniversary of the founding of Whittier, “the Quaker colony with a college in mind.”

By arrangement with the publisher, your Alumni Office can accept *pre-publication orders* at 20% discount (that is, \$5.80 plus .23 tax), if postmarked on or before May 1st. Responses to this offer will help in estimating the final press run and binding order. Your copies will be mailed to you promptly upon publication.*

To: The Alumni Office Whittier College

- ☐ Please accept my order for one copy of Cooper's WHITTIER, *Quaker College in California* at the pre-publication price of \$5.80 (plus \$.23 California State sales tax unless mailed out of state).
- ☐ Enclosed is my check for \$_____ as payment, for which you will mail me a copy of the book upon publication.
- ☐ I wish to order _____ gift copies at the pre-publication price, my enclosed check as payment in full.

Orders must be postmarked on or before May 1st, 1967 for pre-publication discount.

CHARLES W. COOPER/Author

*A handsome gift book for a student, prospective student, or friend of the college — you may wish to order additional copies at the pre-publication discount on or before May 1st.

Whittier, Quaker College in California

"A belief worth sacrificing for!"

At the request of the editor, James B. Moore, instructor in journalism, has written a review of *WHITTIER, Quaker College in California (1887-1967)* by Charles W. Cooper for this issue of *THE ROCK*.

Mr. Moore wrote a brief history of the college for the *DAILY NEWS* in 1962 and has compiled *Whittier College Profiles*, a compendium of general and biographical information now in its eighth edition.

All of us at Whittier College who know Dr. Charles W. Cooper had every confidence that when three years ago he was asked to write a full-scale history of the college, he could do it.

I can now report to alumni and other readers of *THE ROCK*: he did it. And it's first rate!

Having read the book in manuscript, I am looking forward to its publication, on or about May 11th. I hope every alumnus and friend of the college will buy a copy for his library — and I'd say, buy another copy to lend around.

You are right, I am enthusiastic and I will tell you why.

We would expect a professional job of research, organization, and writing from Dr. Cooper — and we have it. *WHITTIER, Quaker College in California* is his tenth book. *Preface to Poetry*, *The Arts and Humanity*, *Preface to Drama*, and *The A. Wardman Story* are some others; and his *The Term Paper* (with Robins) has sold over a million copies.

As for research, an appendix — following a modern practice — gives a running account of his sources, innumerable and wide-ranging. A glance at his table of contents shows a masterful job of organizing the successive periods. As a competent writer should, he constantly makes clear "where in history" the reader is as he is swept along; and he does not bog down in a morass of undigested data or a labyrinth of footnotes.

But thorough research and mastery of material are not enough. In our day of exciting paperbacks, there is a second demand: Is the book interesting? — and is it readable?

I can assure you with a hearty affirmative. This is a dramatic and colorful narrative, the Whittier College Story. It is a story of fond hopes and smashed dreams, of great faith and perseverance, of ironic circumstances and hilarious — sometimes ludicrous — happenings, of "quirky" personalities (to borrow a phrase from Jerramyn West's Preface) and of men and women notable for their intelligence, independence, and integrity. From vivid pen sketches emerge an amazing cast of characters — Jonathan Bailey and Washington Hadley, Thomas Newlin and Susan Johnson, Dexter and Coffin, Harris and the Wardmans, W. O. Mendenhall and Louise Pfuetze, Albert Upton and William C. Jones, Paul S. Smith and John Stauffer — as

well as the long succession of outstanding students. What a shame if they had been subjected to the drab pen of an historical pedant!

Dr. Cooper — as scholar and teacher of drama — knows a good scene when he spots it: the collapse of the first Friends' College, the tear-jerk ending of an endowment campaign, the Maxwell Anderson affair, the \$100,000 John G. Whittier banquet, the verge of Depression bankruptcy, the Quaker dilemma of the war years, student trials and triumphs — all these and more are part of the script.

You will not easily put this book down — though reading it may take a week of evenings. The clear, plain style marches straight forward and so too, strand by strand, does the story. If you here find elements of melodrama, the author himself is neither sentimental nor cynical. And when he laughs, and sets you to laughing too, it is not *at* Whittier College but *with* it.

There is a third demand, beyond mastery of material and readability, that may be called "view-point." Does the writer bring maturity of judgment and broad perspective to his work?

Briefly a student at Whittier College, 20 years a professor of English (10 years also directing in Poet Theater), and more recently an administrative assistant, Charles Cooper '25e brings an unusual first-hand knowledge to his subject. Other experiences have broadened his perspective: A.B. (U.C.L.A.), Ph.D. (Berkeley); adviser, Pasadena Playhouse; visiting lecturer, Harvard; executive secretary, planning committee, Intercollegiate Program of Graduate Studies; co-director with his wife, International Quaker Center in Paris; director, Whittier College in Copenhagen. A Quaker "by conviction," he is deeply committed to the historic concerns of the Society of Friends.

You can see that Dr. Cooper stands far enough *inside* Whittier College to have made the writing of this book an exciting adventure, and far enough *outside* it to bring to it a balanced perspective. By keeping his story in focus against the larger scene, he has been able to write more than a mere "company history." He has made his book worthy of the individualistic American tradition — and the faith — that Whittier College so fully exemplifies.

Hence the title of this review. "A Belief Worth Sacrificing For." It is quoted from Jessamyn West's Preface. I shall not spoil the pleasure of your reading by detailing its contents or by quoting from it further. Written with engaging frankness, pungent wit, and humorous anecdote, this Preface is indeed a major contribution to the work.

James B. Moore

SPORTS ROUND-UP

Since graduating from Iowa State Teacher's College in 1927 and subsequently taking over the coaching reins at Whittier College in 1937, Coach Aubrey Bonham has established himself as one of the winningest coaches in the nation. At the close of the 1966 season he was seventh in the nation (477-266) and first in California in total wins. Further tribute to Bonham's contribution to athletics in Southern California came when the Helms Foundation inducted him into their Hall of Fam in 1961.

In SCIAC competition, Coach Bonham has an equally impressive record. In 27 years he has won outright or tied for 14 league championships and in three of those years (1948, 1959, and 1960) has taken the NAIA district Three Championship. There is no coach in the league that can boast such a record.

In addition to being Director of Athletics, and instructor in physical education, Coach Bonham has published articles in various magazines and periodicals concerning basketball, football, and

track. His educational background is nearly as extensive as his coaching records. He obtained his B.S. and B.A. degrees from Iowa State Teachers College, and his M.A. degree from the University of Southern California. He has also done work at Northwestern University, Drake University, and UC Berkeley. Coach Bonham feels that teaching and coaching are one and the same thing. However, he adds that there is more pressure in coaching than is teaching. From the record it can be seen that pressure and Coach Bonham go together.

This handling of pressure that Coach Bonham so admirably demonstrates, he has passed on to his teams. This year's squad was no exception. Composed primarily of sophomores and juniors, the team gave Bonham some hesitations about its prospects at the outset of the season. Speaking of the unpredictable showing that his highly touted sophomores would supply, Bonham expressed his anxieties. "The new men appear to be the key to our success — sophs are usually great or they choke, so it's truly difficult to predict."

Although they occasionally performed in the latter manner, Bonham's young cagers grew continually in hardwood prowess throughout the season. One series of contests demonstrates this growth markedly. Whittier entertained awesome San Diego State early in the season. The experienced Aztecs found little competition here as they easily ran over the Poets by a thirty point margin. Whittier's offense was rusty as teamwork failed to materialize; it proved a glaring example of the young squad's inexperience. However, the second meeting of the clubs two months later showed the growth that Bonham's men had undergone. Their teamwork indicated a drastically different court sophistication. Although the Poets fell short in their second meeting with State, it was evident that Bonham had brought his cagers a long way.

With their season near completion at this writing, the Poets appear to have posted a .500 mark. Admittedly, from the record this has not been an impressive year at first glance. There are, however, many different angles by which we can view the Poets' past campaign. Optimism can be felt for the years to come. It is apparent that Whittier is loaded with basketball talent. This year, if nothing else, gave the fans an opportunity to observe a "drowsy tiger beginning to awake." Several future stars appeared this season.

At times we experienced a great deal of disappointment in our roundballers, but we were never bored. Whittier's powerful run-and-shoot basketball provides an exciting — often too exciting it seems — brand of action. Next year we can expect to see more. With all his starters returning, and a championship freshman team coming up, Coach Bonham will have all the potential he needs to build a basketball dynasty here at Whittier. The "horses" are here at Whittier again. Their reins, to be sure, could not be in better hands.

POET PROMENADE

Whittier College Tutorial Program Plans Five Projects for Spring Semester

The Whittier College Tutorial Program has undertaken five different educational and recreational projects in the greater Whittier area during the spring semester.

The volunteer tutorial program, in operation at more than a dozen Southern California Colleges, provides opportunities for students to assist in nearby schools and community centers, meeting any needs which may exist in tutoring, assisting teachers, or supervising recreation.

The program is sponsored by the Associated Students and the Student California Teachers Association. Chairman of the new program is Joel Shulman, assisted by Katie Reynolds, SCTA president, and advisors Dorothy Scott, home economics professor, and Esther Kenyon, mathematics professor.

According to Shulman, the committee represents the college on the Southern California Board of Tutorials, an organization of all college tutorial programs in the area.

A small library of books has been collected from private sources, as well as flash cards and other educational materials. Arrangements are being made to use books from the Whittier Public Library, the library of the Whittier Public School district, and the library of the college education department.

Tutorial projects include work with potential high school dropouts who have been recommended by their high school counselors. Continuation of the Los Nietos school district teacher aide, Saturday projects, and after school recreation program — begun last semester — is planned. A third tutorial project is tutoring at Lydia Jackson Elementary School in Whittier, helping kindergarten through sixth grade students in reading, arithmetic, spelling and language.

A fourth project is assisting teachers and counselors at the Fred C. Nelles School for Boys in Whittier, particularly in recreation programs. And the fifth tutorial project is assisting supervisors at the Las Lomas School Tutorial Center in La Habra, which is under the direction of the League of United Latin American Citizens. Under LULAC more than 1200 children are being tutored in five centers by 500 neighboring college and high school students.

Student leaders feel that, in providing supplementary education for children whose performance

in school has been substandard, the emphasis will be placed on creating an atmosphere conducive to academic curiosity and providing a creative and diverse learning experience for the student.

Through the personal relationship developed, the student may develop a better self-image and attitude toward education, at the same time that the college student will have his own opportunity to be exposed to new situations, at times practice what he has learned in his major field of study, and participate in a program involving college and community.

“Madame Butterfly” Highlight of Modern Dance Production

A full length dance interpretation of Puccini’s “Madame Butterfly” highlighted the annual Whittier College modern dance production, “Kaleidoscopes ’67,” performed on stage at the Whittier high school auditorium February 9 and 10.

The program, under the direction of Alyss Sutton, included a variety of choreography created by the students using both jazz and classical accompaniment as well as percussion and voice.

College Report TV Program Featured Whittier College Speech Department

Gerald Paul, director of forensics, and members of the speech department presented the February 12th “College Report” television program on NBC channel 4.

The program is part of the weekly series aired by the Independent Colleges of Southern California, with Dave Bell as producer.

Students Judy Kimbrough, Huntington Beach; Buzz Schupmann, Whittier; Hedge Capers, La Jolla; and Arnie Moore, Bel Aire, gave oral interpretations of poetry and prose by O’Neil, Woody Guthrie, and Ferlinghetti. Forensics director Paul gave interpretations of works by Rudyard Kipling and Norman Corwin and discussed the oral interpretation work of speech department students with Bob Wright, NBC newsman and host of the program.

Oral interpretation forms a segment of the more comprehensive forensics program in college speech, which includes debate, impromptu and extemporaneous speech, and oratory.

Debaters Win 10 Trophies

Poet speakers combined quantity with quality as Whittier's largest squad in history won ten trophies and sixteen certificates at the Pacific Southwest Collegiate Forensic Association Fall Championships, held at Pasadena College and attended by 26 universities and colleges.

Highlighting Whittier's success was a Poet sweep in Novice Oral Interpretation, a second place showing in Novice Debate, and a first place finish in Senior Oral Interpretation.

Women Win 2nd Tennis Championship

Women tennis players at Whittier College have captured their second straight championship in the fall tournament of the Southern California Women's Intercollegiate Sports Program.

The girls played Pomona, UC Riverside, Pitzer, LaVerne, Occidental, Cal Poly Pomona, and the score for the season was 19 matches won and 5 lost.

Team members, coached by physical education professor Peggy Landtroop are Jan Klippel, Susie Smith, Lorna Weather, Ann Hubard, Carol Packer, Donna Konzanjian, Carol Scharfer and Lori Sherrill.

The girls won their spring tournament last year in the Southern California Womens' Round Robin Tennis Tournament, and hope to repeat this spring again.

Nationals From 26 Foreign Countries Attend Whittier

Nationals from 26 foreign countries enrolled at Whittier College in the fall semester — a total of 111 of them, according to figures released by the registrar's office.

With the total figure divided between 84 men students and 27 women students, enrollment at Whittier in the fall makes the foreign student population roughly a little more than one-twentieth of the whole.

Leading the nationals from abroad in numbers are 34 students from Saudi Arabia. Runner-up in numbers is the British Crown Colony of Hong Kong, sending 14. Next are Japan with 11, and Iran with 10. Kuwait has 8 representatives, Korea 4, and South Vietnam, Thailand, and Kenya 3 each. Countries with 2 students each are the Republic of China, India, Peru, and Venezuela. Those sending 1 student each are South Africa, Ceylon, Ecuador, England, Germany, Iraq, Italy, Jordan, Lebanon, Malaysia, Mexico, Norway, and Turkey.

This year's figures on foreign students compare with 109 from 26 countries last year, and 72 students from 19 different countries in 1964.

Another 17 students at Whittier this year list their address as a foreign country since their parents are engaged in occupations abroad.

Frank Irvin Ball Residence Hall Dedicated

Dedication of the newest residence hall on campus, the beautiful Dr. Frank Irvin Ball Residence For Women on Haverhill Park Road (formerly Stanford Way), took place on November 28. La Motte T. Cohu, President and Chairman of the Board of Cohu Electronics and member of the Board of Trustees, presided at the ceremonies. Participating were Dr. E. Ezra Ellis, pastor of First Friends Church, Whittier, and lecturer in religion; President Paul S. Smith; Mrs. Ethel A. Ball, principal donor; Thomas W. Bewley, President of the Board of Trustees; and William H. Harrison, architect, who gave an interesting and detailed account of the building's special features.

During the dedication Mrs. Ball was presented with a bouquet by Carol Simmons, house president. The new facility, latest of five large residence halls completed on campus in a decade, was built at a cost of \$630,000, and named for the husband of Mrs. Ball, dentist and civic leader in Portland, Oregon, for many years. The residence provides on-campus living for 100 women.

A Cappella Choir Makes Northern Tour

The 46-voice Whittier College a cappella choir, under the direction of Eugene Morrison Riddle was on tour of northern California during the semester break. Considered one of the outstanding college choirs in California, the choir represents all segments of the student body.

The repertoire for this year included representative choral works from the Renaissance through the contemporary period. Featured works were the Magnificat for triple choirs by Andrea Gabrieli and the Bach Motet I, Singet dem Herrn. Both works were accompanied by continuo composed of an especially designed portative pipe organ and cello. Other selections included works by Monteverdi, Brahms, and Dello Joio.

The choir also presented lighter works by contemporary composers including several folk songs sung in their original languages.

The Whittier College Madrigal Singers accompanied the choir and presented representative selections from the repertoire.

The choir is in its 21st year under the direction of Eugene Riddle, who has been a professor of music at Whittier since 1936.

Alumni are Invited to the Spring Sing

The annual Spring Sing will be held in conjunction with Parents Day, Saturday, April 22 at 7:00 P.M.

Invitations were sent to all parents of Whittier College students inviting them to attend the annual Parents Day and Spring Sing according to Dean of Students, Dr. Charles Montgomery, and student co-chairmen, Pat Peterson and Jean McGuckin.

Left to Right: Mark Phillips, Mrs. James Phillips, Mrs. James Brougher Jr., and Mrs. Ethel Ball.

15

Tennis Courts Get New Coating

The tennis courts, constructed a few years ago on the Whittier campus, partly with funds provided by the Whittier College Associates, now have a new special tennis court coating of green inside and red outside, thanks to professor of physical education, Margaret Landtroop (Mrs. Joe M.) Assisting in the fund raising for the special project were the 1195 Club, the Whittier Tennis Club, alumni and friends of the college, and especially the physical education majors, all of whom joined in the \$1400 campaign for funds headed by Mrs. Landtroop.

President Paul Smith Given Freedom Award

Dr. Paul S. Smith was given the Freedom Award "for outstanding service to the American way of life" by the Wilshire Sertoma Club of Los Angeles on February 15, 1967.

The citation was made at a luncheon at the Chapman Park Hotel in Los Angeles at noon.

Dr. James W. Carson of the Wilshire Sertoma, in presenting the award, cited Dr. Smith for "service to the community as an outstanding citizen and educator."

The Wilshire Sertoma Freedom Award has previously been given to Dr. Lee DuBridge, president of the California Institute of Technology, Los Angeles Chief of Police the late William H. Parker, and Judge William B. McKessen of the Los Angeles Juvenile Court, among others.

Messages of congratulation were read at the luncheon from Richard Nixon, New York; J. C. Baldwin and John Stauffer, Los Angeles; J. D. Robinson, Fallbrook, and Lee McNitt, Whittier.

Dr. Smith gave a response to the some 100 guests present at the luncheon, addressing his remarks to the subject of the independent, private college and university.

16

L to R, Dr. James W. Carson, Dr. Paul S. Smith, and Sertoma Club president, Roger H. Ferger.

FACULTY NOTES

Dr. Milo Connick, Chairman of the Religion Department, has written two new books:

An Introduction to the New Testament, scheduled to appear in 1968, will be printed by the Dickenson Publishing Company, Inc. While it is designed primarily as a textbook for college and university classes, it will have a special tradebook sale as well. A distinctive feature of the work will be a triple-threat treatment of the New Testament from historical, literary, and theological viewpoints. Maps, charts, and photographs (many taken by Dr. Connick during seven Whittier College Study Tours to the Holy Land) will illustrate the volume. While some books scratch the surface of the New Testament study and others serve only the needs of specialists, this one will be geared for the students themselves. The author's aim was to produce a work of both style and substance. (A companion volume which will cover the Old Testament is being written by Dr. Keith Beebe, Occidental College.)

An Introduction to Religion, also scheduled to appear in 1968 under the imprint of the Dickenson Publishing Company, is a joint project with his colleague in the Philosophy & Religion Department, Dr. Nelle G. Slater '50. It will deal with the nature and function of religion and relate contemporary concerns about religion to the physical, behavioral, and linguistic sciences. God, man, and their relation will be viewed from different perspectives, and the role of faith and its expression in prayer, worship, and witness will be explored. Readings from the leading figures in the field of religion will be included, and it is expected that the book will have wide appeal — especially in state schools where religion is receiving accelerated attention.

Alyss Sutton, physical education professor, will leave this spring for a year's sabbatical in Europe, where she will study and photograph (with motion picture camera) folk dances of Scandinavia and Europe, and study physical education programs for elementary, secondary, and college levels.

Dr. Nelle Slater, associate professor of religion, addressed the Ada S. Nelson PTA in Whittier on March 17.

Dr. Isis M. Galindo, associate professor of Spanish, attended as a member the first Reunion of the XIII Congress of Ibero-American Literature at the University of California, Los Angeles, January 18-21. Held to commemorate the Ruben Dario Centennial Celebration (he is considered one of the greatest poets of Latin America), the Reunion had as guests distinguished literary figures from Spain, Costa Rica, Nicaragua, and Brazil.

Dr. Ha Tai Kim, associate professor of philosophy, will attend the Philosophy Institute sponsored by the University of the Pacific, at Asilomar in June.

Dr. Richard B. Harvey, associate professor of political science at Whittier College, was a panel discussion leader at the American Assembly conference on the California State Legislature, held in Palm Springs, January 26-29.

The conference, under the sponsorship of Occidental College, is one of several held nation-wide under the auspices of the American Assembly, at which educators, businessmen, and leaders from all areas of American life discussed the state legislature. Some 90 representative leaders attended the meeting, and were addressed by Jesse M. Unruh, speaker of the California state assembly; Lieutenant Governor Robert H. Finch; Bruce W. Sumner, chairman of the revision commission of the California constitution; and Elton K. McQuery, director of the western office, Council of State Governments.

The American Assembly, founded by Dwight D. Eisenhower when he was president of Columbia University, is a national, non-partisan educational institution which holds meetings of national leaders and publishes books to illuminate issues of United States policy.

Since its founding in 1950 it has joined with over 75 institutions in holding these meetings.

Drama Department to Produce Two Plays

The Whittier College Drama department this semester will produce two plays. The first (to be presented on March 9, 10, and 11) will be William Saroyan's *The Cave Dwellers*, an impressionistic study of people who have taken refuge in an abandoned theatre. The play, directed by Jack de Vries will be performed at the Whittier Civic Center auditorium (curtain rises at 8:15).

On the 11th, 12th, and 13th of May, the drama department will present Arthur Miller's classic, *Death of a Salesman*. The production will be directed by Dr. Robert M. Treser, head of the drama department.

Phi Sigma Tau Established Here

Phi Sigma Tau, national honorary society in philosophy has established its chapter at Whittier College. Members participated in a dinner-installation at the William Penn Hotel banquet room with Dr. Ha Tai Kim as advisor to the group.

Among those inducted into the society were Dr. Hilmi Ibrahim, physical education professor and William Geiger, English professor.

Started in 1930 as Alpha Kappa Alpha, the national philosophy honorary society became Phi Sigma Tau in 1955. There are 45 chapters (including Whittier, which is the 45th). The group plans three or four philosophy discussions and lectures which will be open to the public during the semester.

The Woman's Auxiliary and 75 WC Alumnae Hear Lecture by Helen Brice Smith '39

Whittier College alumnae were spotlighted at the January 31st meeting of the Woman's Auxiliary of Whittier College, according to Mrs. Hugh Maples, president. Seventy-five alumnae attended the meeting and had an opportunity to meet former classmates and friends.

Alumna Helen Brice Smith '39, manufacturer of educational toys, lectured on "When Children Play."

Stephen Gothold '63, choral director at Whittier High School, directed the Whittier High School Cardinal Ensemble in a special musical program.

Serving at tea chairman for the day was Mrs. Marlon Davis. Flowers, reflecting the Whittier College colors, of purple and yellow enhanced the tea table.

Mrs. Maples invited all alumnae to join the auxiliary and welcomed them back to future meetings.

Student Teachers Volunteer Work in Los Nietos School District

Some thirty Whittier College students — members of the Student California Teachers Association — are volunteering to assist teachers in the Los Nietos school district with regular sessions at the Child Development Center, Saturday projects at Los Nietos Intermediate School, and playground supervision at Wiggins School.

Saturday projects at Los Nietos school have included tours to Farmer's Market and Whittier College and a workshop on costume jewelry.

At the pre-kindergarten Child Development Center, Whittier College students have assisted teachers and teacher's aides with class, project, and playground work. And at Wiggins School they have supervised recreation.

President of the Whittier College Student Teachers Association, Katie Reynolds, and advisor Dorothy Scott, home economics professor, have coordinated the volunteer work, which has been carried on for two months and will continue during the spring semester.

The volunteer work has been under the supervision of Glenn R. Lawson, Coordinator of Compensatory Education for the Los Nietos School District.

Mr. and Mrs. William F. Soeberg were members of the Whittier College Associates for the 1965 - 1966 year and should have been so recognized in the recent Honor Roll.

We sincerely regret the omission.

A black and white photograph of a university campus. In the foreground, a large palm tree trunk is on the left. A winding path leads through the middle ground, flanked by various trees, including a large pine tree on the right. In the lower foreground, there is a small sculpture of a globe on a pedestal and a low, rectangular hedge. Two people are standing near the hedge, and another person is lying down nearby. The background shows more trees and a clear sky.

OLD ACQUAINTANCES

NEWS OF ALUMNI
BY CLASSES

SPECIAL FEATURE:
SONS AND DAUGHTERS
OF ALUMNI

"For fifty years our class has met each year for a reunion," recalled Oscar O. Marshburn, Chairman of the Class of 1917 Reunion Committee.

During the past several months plans have been in the making for the celebration of the 50th anniversary of the Class. Members of the reunion committee are very anxious to reach everyone who was ever in that Class regardless of how brief a time it may have been.

All members of the Class will be invited to an evening at the home of Mr. and Mrs. Marshburn on Friday, June 9th and also to the Alumni Day luncheon on Saturday, June 10th. Following the luncheon on Saturday there will be an informal gathering on campus. On Saturday night a dinner is planned for all those who graduated with the Class.

If you wish to participate in the festivities please contact Oscar Marshburn, 8557 South La Sierra Avenue, Whittier.

'10

Cora Laport has been doing volunteer work at the Princeton YM & YWCA; recording for the blind at the Princeton Center and playing for weekly hymn sings at Meadow Lakes. She shortly will embark on a 24-day cruise to the islands in the Caribbean.

Mrs. Hannah Milhous Nixon has a grandson Lawrence attending Whittier College in the Junior class majoring in Psychology.

'17

Claude O' Sams' son-in-law, Lt. Col. Jim Parker, has been in Vietnam since July. His daughter and six year old grandson live in Whittier.

'22

Dr. Roger Hickman has retired from his directorship of laboratories at Harvard University.

'23

Robert W. Myers has retired after 32 years with the Myers Ply Goods Company. He has three grandsons, Michael, 8; Robert, 6; and Stephen, 2.

'25

Mr. O. T. Cosand has a son, Thomas, attending Whittier College in the Senior class majoring in Psychology.

'28

Herman H. Henkle spent July and August 1966, in Pakistan on the development of national science libraries and information centers. He has, since then, been appointed to serve on the national advisory Council on College Library Resources.

William H. Sucksdorf has a son William, Jr. attending Whittier College in the Sophomore class majoring in Mathematics.

Virginia Wilson Reed has a daughter Janet attending Whittier College in the Senior class majoring in History.

R. Arlington Mills has a son Ronald attending Whittier College in the Junior class majoring in Biology.

'29

Wallace and Camilla Luttrell Wiggins have a son who recently graduated from Occidental College and is now in the U.S. Air Force. He is taking pilot training.

'30

Perl N. Guptill has a daughter Gayle attending Whittier College in the Senior class majoring in English.

'31

Mr. and Mrs. James W. Jones (Mabel Evans '31) have a daughter Janie who is a graduate student at Whittier College majoring in Speech and

Drama.

Ruby Ball Pierce is presently teaching the fifth grade in Petersburg, Alaska.

Prentiss E. Moore has a son Prentiss, Jr. attending Whittier College in the Senior class majoring in Speech.

John M. Howard has a son Alan attending Whittier College in the Junior class majoring in History.

Mr. and Mrs. Emile Crumly (Florence Binford '31) have a son William attending Whittier College in the Junior class majoring in Physics.

Mr. and Mrs. Ronzo D. Hawley, Jr. (Wilma Hackley '31) have a daughter Linda attending Whittier College in the Junior class majoring in English.

'32

Jane McMurray Troutner is now teaching physical education at South Whittier Junior High. She rode in the Homecoming parade as a past president of A.W.S.

Mark R. Jacobs has a daughter Paula attending Whittier College in the Senior class majoring in Sociology.

Mary Fae Moffett Pickering has a daughter Susan attending Whittier College in the Freshman class majoring in History.

'33

Harold A. Space is a retired engineer of the Arabian American Oil Company. He is presently residing in Santa Ana, California.

Vincent Sinatra has a son Frank attending Whittier College in the Senior class majoring in Chemistry and Biology.

Merton Wray has a son Norman attending Whittier College in the Junior class majoring in Political Science.

Howard Krueger has a daughter Linda attending Whittier College in the Junior class majoring in History.

Willard H. "Bill" Brink is President of the Western Brass Works of Los Angeles.

'34

Mary Haven Mullen is substituting in Orange County Schools and, in her "spare time," is helping her husband remodel a log house they own in the canyon.

Mabel M. Bumgardner has been president of the Zeta Eta Chapter of the Delta Kappa Gamma Society for the past two years.

Mr. and Mrs. Arthur Rufus Trueblood (Elizabeth Perry x'34) have a son Bill attending Whittier College in the Senior class majoring in Business Administration.

W. Roy Newsom has a daughter Nina attending Whittier College in the Sophomore class majoring in History and Political Science.

Edward D. Sproul has a daughter Patricia attending Whittier College in the Junior class majoring in Psychology.

'35

Madaleine Walker Dietrick Cline has a daughter, Jacque, attending Whittier College in the Senior class majoring in Political Science.

Vera Holloway Alger has a son, Dean, attending Whittier College in the Freshman class.

Eleanor Crill Krage has a daughter, Jeanice, attending Whittier College in the Senior class majoring in German.

'36

Mr. and Mrs. George Fobes (Margaret Hathaway, '39) have a daughter, Frances, attending Whittier College in the Sophomore class majoring in Sociology.

W. J. Moorhead has a daughter, Sharon, attending Whittier College in the Senior class majoring in Spanish and Mathematics.

Dr. Joseph Cosand, President of the St. Louis (Mo.) Junior College District, has been made a member of the Carnegie Foundation Commission for a study of higher education in the United States.

'37

Catherine Henry Castle has just completed her own television series geared to parents and teachers convincing them "You Can Tell A Story."

She is also teaching a fourth grade class at Woodstock School, Alameda, Calif.

Barbara Butterfield is retiring from active duty January 1, 1967. After twenty years in the Navy-Medical Service Corps, she plans to stay in San Diego.

Mr. and Mrs. Donald Shively (Wilma Pemberton '37) have a daughter, Marjorie, attending Whittier College in the Sophomore class majoring in Biology.

Mr. and Mrs. Robert M. Kennedy (Barbara Todd '37) have a daughter, Clelia, attending Whittier College in the Sophomore class majoring in Art.

Charles Stevens has a daughter, Charlene, attending Whittier College in the Sophomore class majoring in Sociology.

Mr. and Mrs. Kenneth Richardson (Shirley Vitt '37) have a son, Kent, who is a graduate student at Whittier College majoring in Mathematics.

Mr. and Mrs. Newton P. Robinson (Margaret Lautrup Robinson '37) have a daughter, Sally, attending Whittier College in the Junior class majoring in Mathematics.

'38

Mr. and Mrs. Horace S. Rees (Marjorie M. Rueger '41) have a daughter, Dorothy, attending Whittier College in the Sophomore class majoring in Sociology.

John and Ruth Railsback Bateman traveled this summer from Costa Rica, Central America, up to Canada, and back home again.

Wilma Pitkin Stinebaugh has a daughter, Nancy, attending Whittier College in the Junior class majoring in Sociology.

Anna Johnson Spencer has a daughter, Margaret, attending Whittier College in the Junior class majoring in Sociology.

Marjorie Davis Irmsher has a daughter, Kristine attending Whittier College in the Senior class majoring in Home Economics.

Mr. and Mrs. Walter F. Dexter (Lucy Lee Garlinghouse '41) have a son, Daniel, attending Whittier College in the Freshman class majoring in Mathematics. Daniel is the Grandson of the fifth President of Whittier College, Walter F. Dexter 1923-1934.

Mr. and Mrs. John Kegler (Jean Bassett '38) have a daughter, Jean-Ellen, attending Whittier College in the Junior class majoring in Political Science.

Frank Sinatra, Jr. has a son, Frank III, attending Whittier College in the Junior class majoring in Political Science.

Mr. and Mrs. James Ockerman (Doris Mead '39) have a son, Gerald, attending Whittier College in the Junior class majoring in History and English.

'39

Dorothy Doring is teaching the fourth grade in San Gabriel, California. She will be taking a leave of absence in January to go to the Orient and on to New Zealand and Australia to visit friends.

Mr. and Mrs. Thurston Sydnor (Mary Thompson '41) have a son, Robert, and a daughter, Mary, attending Whittier College. Robert is a Sophomore majoring in the Physical Sciences and Mary is in the Senior class majoring in English.

Doris Crooks Parsons has a daughter, Lorraine, who is a graduate student at Whittier College majoring in History.

Louise Williams Perkins has raised a family of five children after her graduation from Broad Oaks, Whittier College. Continuing her education, she earned an M.A. in elementary school administration and is presently Secretary of the Alumni Association at Claremont and is teaching in Claremont Unified School District. She is a member of Pi Lambda Theta.

'40

Alice Saunders Cusick has two sons, John and Theodore, attending Whittier College. John is in the Junior class majoring in Mathematics and Theodore is a graduate student majoring in Political Science.

Mr. and Mrs. Gene O. Wineinger (Margaret Nicholson x'40) have a daughter, Marilyn, attending Whittier College in the Junior class majoring in Physical Education.

Marian Swope Stokes has a son, Stephen, attending Whittier College in the Freshman class.

LeRoy Hughes has a son, Robert, attending Whittier College in the Senior class majoring in Drama.

Ruth Kulp McGuckin has a daughter, Jeanne, attending Whittier College in the Senior class majoring in Home Economics.

Gertrude Mowry Lingo has a son, Charles, who is a graduate student at Whittier College majoring in Psychology.

Isabel McCormac Angelsen has a daughter, Doris Jean, attending Whittier College in the Junior class majoring in History.

Anita Tarr Graves has a daughter, Carolyn, attending Whittier College in the Sophomore class majoring in Music.

'41

Mr. and Mrs. Robert Hartman (Mary Ellen Perry '41) have two daughters, Linda and Jan, attending Whittier College. Linda is in the Freshman class majoring in History and Jan is in the Senior class majoring in Physical Education.

Mr. and Mrs. Arthur Marshburn (Carol Mead '41) have a daughter, Jean, attending Whittier College in the Senior class majoring in French.

Mr. and Mrs. Herbert E. Tebbets (Barbara Jean Mitchell '44) have a son,

Ronald, attending Whittier College in the Senior class majoring in Business Administration.

Mr. and Mrs. Jack Henderson (Verdona Herr '41) have a daughter, Beth, attending Whittier College in the Junior class majoring in English.

Mr. and Mrs. T. Wade Brown (Kitty Lou Kaler '41) have a daughter, Bonnie, and a son, William, attending Whittier College. Bonnie is a Freshman and William is a Senior majoring in Sociology.

Mr. and Mrs. Paul J. Hardin (Lois Collins '42) have a son, David, attending Whittier College in the Sophomore class majoring in Music.

Jay R. Wyne has a daughter, Cynthia, attending Whittier College in the Sophomore class majoring in History.

'42

Mr. and Mrs. Jack Spence (Myla Hathaway '44) have a daughter, Teri, and a son, Robert, attending Whittier College. Teri is in the Freshman class majoring in Art and History, and Robert is in the Junior class majoring in Biology.

Ruth Hundley Edinger is doing part-time work as an R.N. for Dr. Barmore. She has also been working at the Good Samaritan Hospital. She has two sons, David and Paul, attending Whittier College. David is in the Freshman class and Paul is a Senior majoring in Geology and Chemistry.

Mr. and Mrs. James H. Whitson (Hannah Thomas '42) have a daughter, Carol, attending Whittier College in the Junior class majoring in History.

Mr. and Mrs. Norfleet Callicott (Barbara Stambaugh '43) have a daughter, Linda, attending Whittier College in the Freshman class majoring in Physical Education.

Mr. and Mrs. John A. Scott (Velma Ramsey '42) have a daughter, Jacquelyn, attending Whittier College in the Junior class majoring in History.

Paul C. Joy has a daughter, Jeannine, attending Whittier College in the Sophomore class majoring in Sociology.

Mr. and Mrs. Walter K. Hooker (Carol Calkins '42) have a daughter, Carol, attending Whittier College in the Junior class majoring in English.

Glenn M. Wyne has a daughter, Anita, attending Whittier College in the Sophomore class majoring in Physical Education.

Roger Van Bellen has a daughter, Louise, attending Whittier College in the Sophomore class majoring in Sociology.

Keitha Downs Wagner has a daughter, Lietta, attending Whittier College in the Sophomore class majoring in Home Economics.

'43

Elizabeth Lamb Tunison is principal of the Yorbita School in the Rowland School District. She also is treasurer of the Los Angeles County Administrators Association and secretary of the California Elementary School Administrators Association.

Ivan A. Welborn has a daughter, Margaret, attending Whittier College in the Junior class majoring in Home Economics.

Esther Cleveland Gilmore has a daughter, Kathy, attending Whittier College in the Senior class majoring in Sociology.

Ed Paterson has a daughter, Linda, attending Whittier College in the Junior class majoring in History.

Mary Belle Bickel Shields has a son, Gary, attending Whittier College in the Junior class majoring in Sociology.

Shirley Thomason Van Epps has a daughter, Terri, attending Whittier College in the Sophomore class majoring in History.

Milton Buffington has a son, Milton, Jr., attending Whittier College in the Junior class majoring in Political Science.

Mr. and Mrs. Donald Henderson (Annabell I. Richter '41) have a son, Donald, Jr., attending Whittier College in the Junior class majoring in Economics.

'44 William E. Colborn has a son, James, attending Whittier College in the Junior class majoring in Sociology.

Virno Panicacci is a member of the Bell Gardens City Council.

'45 Bernard G. Keuper is pastor of the Escanto Methodist Church in San Diego. His wife, Dorothea Anderson, teaches part time at Mt. Miguel High School in Spring Valley, California.

Marilyn Burke Clarke has a daughter, Catherine, attending Whittier College in the Freshman class majoring in Business Administration.

Mary McVey Moreno has a daughter, Carolyn, attending Whittier College in the Junior class majoring in Home Economics.

'46 Violette Bakuen married Douglas Redpath on June 13, 1965. Doug is comptroller for the Independent Press Telegram.

'47 William Bradshaw was named Staff Scientist for the year 1966. He has a small group which is a part of the Materials Science Laboratory at the Lockheed Missiles and Space Company in Palo Alto, Calif.

Willa Klug Baum is in charge of the Oral History Department of the University of California at Berkeley.

Dr. Robert D. Peterson, Jr. has been elected Superintendent of Schools of Orange County, California.

'48 Betty Ternquist married James William Harig on December 18, 1965 and are now living in San Gabriel, Calif. Betty is teaching physical education at Arroyo High School in El

Monte and Jim is an engineer with Lockheed Aircraft in Burbank.

Lucie E. Weeks is director of Project L.I.F.E. (Language Instruction to Facilitate the Education of Hearing Impaired Children). She is also an instructor in the Graduate Department at Ohio State University and teaches Language Development in Deaf Children.

Mr. and Mrs. Howard Seelye (Gloria Walls x'48) have a son, Randy, attending Whittier College in the Freshman class majoring in Journalism.

'49 Thomas J. Hall is the Principal of Durfee School in El Monte. He was the past president of the Kiwanis Club of El Monte in 1965, and Secretary of the Kiwanis Division in 1966. Also in 1966, he was chosen the Kiwanian of the year.

Conrad Ked Creed has two daughters, Kristine and Karen, attending Whittier College. Kristine is in the Freshman class and Karen is in the Sophomore class majoring in Chemistry.

Earl Ody has a daughter, Cheryl, attending Whittier College in the Junior class majoring in History.

Mr. and Mrs. Robert H. Armstrong (Frances E. Copeland '43) have two sons, James and John attending Whittier College. James is in the Freshman class majoring in Music, and John is in the Sophomore class majoring in History.

William G. Smith has a daughter, Laurie Anne, attending Whittier College in the Sophomore class majoring in Home Economics.

'50 Gloria (Elias) Law has her M.A. degree in Guidance & Counseling and is teaching at Montebello Unified School District. Glen, her husband, is teaching at Downey Senior High. Their daughter, Glenda, is now six years old.

Robert B. Barraza announced his candidacy for Pomona City Council from the 1st District. He teaches world affairs, government, and sociology at Ganesha High School.

T. H. Clements, Ph.D., is presently an administrator at Foothill College and will be the Dean of Students at De Anza College when it opens in September.

Jack Gilbert has a daughter, Sharon, attending Whittier College in the Sophomore class majoring in Biology.

'51 Larry Macaray recently featured his oils, acrylics, colleges, and drawings in a one-man art show. Macaray, named chairman of the Fine Arts Committee in Anaheim, is presently an instructor at El Camino College.

John Crippen is chairman of the boy's physical education department and varsity basketball coach at Excelsior High School in Norwalk, Calif.

Margaret Murray Ridenour will be traveling for a year in the USA, Mexico, and Canada, and will be spending the winter in Florida.

Maurice T. Reeder has a son, Steve, attending Whittier College in the Freshman class majoring in Biology.

Virgil E. Smith has a son, Robert, attending Whittier College in the Junior class majoring in Physical Education.

Eugene G. Carson has a son, Eugene, Jr. who is a graduate student at Whittier College majoring in Business Administration.
